AUMIRAH

Saraswati

ॐ / Om

Way / Path

Aumirah is portmanteau of words from Sanskrit- Aum and Ira. Knowledge has always been sacred in India, and the name has been chosen carefully to reflect the same ancient Indian value that we carry for the ideas, knowledge, intellectual property, and requirements of our clients. The name is to serve as a constant reminder to us of this value of ours.

# ABOUT

Aumirah is a full service intellectual property (IP) services and private equity (PE) consulting & advisory firm with a global footprint. We provide our IP services for clients across the globe in countries across the globe directly and through trusted associates whereas our private equity practice focusses on providing our expertise in private equity to startups and MSMEs from angel funding round to VC/PE funding.

Our expertise in IP provides us insight into products/ offerings/ technology of a business and which in a way helps us better in structuring, negotiating and advising PE deals, especially for startups with great focus on technology and IP.

# VISION

**Vision :** To become one of the most formidable team of techies and lawyers with experience in both IP and PE law at same time.

**Mission :** To enable grant or registration of IP rights, anywhere in the world, from "minimal information" by innovating new mechanisms of obtaining, collating and utilising such minimal information.  
To utilise our IP expertise in combination with our PE expertise in making PE transactions as simple as possible creating win-win scenarios for different parties involved in transactions.

# VALUES

Knowledge is sacred

Trust is mandatory

Teamwork is essential

Delivering on Promises

The above are the four values that drive our engagements with our colleagues and our clients in delivering any kind of work. Since, we operate in high knowledge industry, we are of the opinion that a perfect service cannot be delivered without constantly applying the above four values to any task we do.

# STATS

**2000+**

Number Of Patents Filed  
Around The World

**1500+**

Number Of Patents  
Filed In India
